Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest a multi-particulate formulation comprising bisoprolol and a pH-dependent polymer wherein the core of bisoprolol is coated with the polymer to produce a pH-dependent release profile wherein an initial lag period exists for at least 3 hours and thereafter providing a sustained release profile over a 24 hour period. The prior art does not teach the polymer to be a pH-dependent polymer that exhibits such a release profile.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
